Subject: Bremerton Gas Works Site

Hi Erika,

My name is Darin Deehr and I work in the Title Records Office here in the NRB. We have been receiving documents from the Shoreline District related to the remedial investigation and feasibility study of the Bremerton Gas Works Superfund Site. The original lease file between the DNR and Cascade Natural Gas has long since been archived and not available for adding documents. Are these documents that should be forwarded to your unit?

Thanks for your help.

Darin
